Project:

1. FACIAL RECOGNITION BASED ON ATTENDENCE SYSTEM.

- Facial recognition attendance system uses facial recognition technology to identify and verify a person using the person's facial features and automatically mark attendance.
- The software can be used for different groups of people such as employees, students is the task of generating a short and concise summary that captures the salient ideas of the source text
- Documented the whole process and presented it as MCA Project.

EXTRA CURRICULAR ACTIVITIES

- Worked as a class representative (CR) during my MCA where I coordinated with staff and students about classes, workshops, seminars, cultural activities etc.
- Playing Badminton
