Summary:

❖ Good knowledge on AWS services such as EC2, VPC, S3, RDS, Route 53, Cloud Watch, SNS, Autoscaling group and Cloud Operations and Git, GitHub, Jenkins, maven and tomcat.

❖ Well-versed in Cloud Compute, AWS Services, Security, and high availability solutions provider to customers.

❖ Possess excellent communication with exceptional interpersonal, problem-solving, leadership, team building & presentation skills.

❖ Good understanding of the principles and best practices of Software Configuration Management (SCM) in Agile, scrum and waterfall models.

Area of Expertise

➢ AWS services such as EC2, RDS, VPC, Cloud watch, S3, Ebs and workspaces.

➢ Provisioning new Servers and hosted on the cloud.

➢ Designing High Availability applications utilizing AWS services.

➢ Work towards 100% uptime of the application.

➢ Restore normal service operations as quickly as possible.

➢ Good knowledge on Linux.

Technical skills:

Operating Systems	Linux, Windows
Container Tools	Docker, Kubernetes
Version Control & SCM Tools	GIT, GitHub
Build Tools	Maven
Continuous Integration	Jenkins
Cloud	AWS, EBS, S3, EC2, Load Balancers, Auto Scaling, VPC, IAM, Route 53, SNS, RDS, CloudWatch.

AWS

- ➢ Good understanding and experience in working on Amazon Web Services (IAAS/PAAS).
- ➢ Knowledge of AWS Infrastructure services.
- ➢ Amazon EC2, RDS, Amazon S3.
- ➢ Experience with Amazon Cloud Computing web services including Elastic Compute cloud
- ➢ Keep updating knowledge on AWS.
- ➢ Deploying/Hosting applications on the servers.
- ➢ Creating users, roles, and profiles, assigning roles and profiles to users.
- ➢ Implementing best practices for AWS
- ➢ Auto scale and ELB implementation for Highly Available solutions.
- ➢ Patching Servers using Systems Service Manager.
- ➢ Knowledge of Version Control Systems like **GIT and GITHUB**.
- ➢ Extensively worked with automation tools like **Jenkins** to implement end-to-end automation.
- ➢ Administered and Implemented CI tool **Jenkins** for automated builds.
- ➢ Experience in using **Tomcat** application servers for deployments
- ➢ Used Jenkins for continuous integration and deployment into Tomcat Application Server.
- ➢ Automating the build process for creating **JAR/WAR** files using **Maven**.
- ➢ User administration tasks like adding, deleting, unlocking and password.
- ➢ Provide permissions to users, changed ownership on files and directories.
- ➢ Configured SSH for securing the server.

Educational Qualifications:

Qualification	Board/University	Aggregate	Year
MCA	JNTUK	70%	2022
B.SC	Acharya Nagarjuna University	73%	2019
INTERMEDIATE	State Board	66%	2016
S.S.C	State Board	75%	2014
